(S.P.A.T.)

Kaduceus provides hands on career training programs that leads to a national student certification in health careers. Taught by your teacher, our program consists of curriculum, lab equipment and an online portal for teachers and students. Certification programs give the students an opportunity to participate in real life training in a variety of healthcare professions. Each program gives high school students a real-world experience, hands-on career training, job shadowing and externships. We also provide a Foundations of Health Science program. **We are passionate about helping teachers and students succeed.**

Why Choose Kaduceus?

All of the Kaduceus programs and curriculum have been designed by teachers for teachers. We have taught the program and worked with students; we understand what is needed is to "edu-tain" the students. We have found that keeping the curriculum fun, informative and fast pace keeps the students excited about coming to class. We offer a combination of online and traditional lectures and assignments. Teachers will find easy access to our user friendly Kaduceus website and retrieve the available tools at your disposal from home or school for class preparation.

What can Kaduceus Do For You?

- Alignment with National Certifications
- Program Coordinator Support
- Teacher Training included
- Lab Equipment and Supplies
- Hands on Activities
