

CTE in North Carolina

The North Carolina economy is experiencing a skills gap...

54% of jobs in North Carolina require skills training—more education than high school but less than a four-year degree.

44% of North Carolina workers are trained at this level.

Career and technical education (CTE) programs can fill these gaps, particularly in North Carolina's key industries, like:

- food processing and manufacturing
- tourism
- energy
- information technology

In 2022, 97% of North Carolina high school CTE concentrators pursued postsecondary education, entered the workforce, or joined the military or Peace Corps immediately after graduation.

Many students are already enrolled in CTE in North Carolina, developing technical, academic and employability skills and engaging in work-based experiences with industry partners. During the 2021-22 school year, North Carolina had:

547,176

secondary CTE participants

103,330

postsecondary CTE participants

These youth and adult learners in CTE programs are more engaged, graduate high school at higher rates, earn industry-recognized credentials, and have rewarding and family-sustaining careers.

Four-year cohort graduation rate in North Carolina (2021-22)

50,068

postsecondary credentials earned by CTE students in North Carolina (2021-22)

More investment is needed to scale CTE programs across North Carolina to ensure that all learners, including historically underserved learners, have access to high-quality CTE programs in high-skill, high-wage and in-demand career fields.

CTE: Good for Students, Good for Business, Good for Communities!
